Privacy Policy

Last Updated: April 30, 2026

This Privacy Policy describes how FOP Tkach Oleksandr collects, uses, and protects your information when you use the unified TUWA ecosystem, including the [Quasar dashboard](#).

1. Core Principle: Self-Custody

Our philosophy is Purist Web3. We operate on a Local-First and Self-Custody basis. We NEVER ask for, access, or store your private keys. You maintain full sovereignty over your digital assets.

2. Data Collection & Notifications

To provide the Quasar dashboard features, we collect limited data. During initial registration, we collect your email address strictly for sending necessary notifications. We also collect public wallet addresses and transaction metadata to synchronize your history across devices. We never share your data with third parties.

3. API Keys & Infrastructure

We utilize Alchemy strictly as our core infrastructure for RPC services. Users have the option to provide their own custom RPC API keys. Any custom API keys you provide are strictly encrypted in our database. Only you can view and decrypt your key.

4. Data Storage and Protection

Most operations occur locally on your client device using Local Storage. Any synchronized metadata is protected using industry-standard security measures.

5. Your Rights

You have the right to access the data associated with your account and request its complete deletion from our infrastructure at any time.
